

Keeping our reservoir in tip top condition

Yeoman Hey Impounding Reservoir We're sorry that our work will take a little longer

Every now and then our reservoirs need a little bit of care and attention. We carry out routine inspections on all of our reservoirs to make sure they're working to the highest standard. Following an inspection at Yeoman Hey Impounding Reservoir we need to carry out some improvement works.

We will be rebuilding and strengthening the existing dry stone wall on the crest between Yeoman Hey and Dove Stone reservoirs. We'll be doing this in sections and will be reusing the stone in the existing wall. Once we're finished, the new wall will look similar to the old wall, just a little taller and wider.

How will this affect you

Temporary car park closure: We will need to temporarily close Binn Green car park to allow us to safely store equipment. We know that this is inconvenient and we will re-open the car park as soon as it's safe to do so, we hope to do this by the end of July 2018.

For now, please use the car park at Dove Stone Reservoir, this is located off the A635 down Bank Lane.

Walkers: For the safety of walkers, we will need to temporarily close the footpath along the crest between Yeoman Hey and Dove Stone reservoirs. This will be closed from the end of October to the end of June. Please see the footpath diversion in place for you to enjoy.

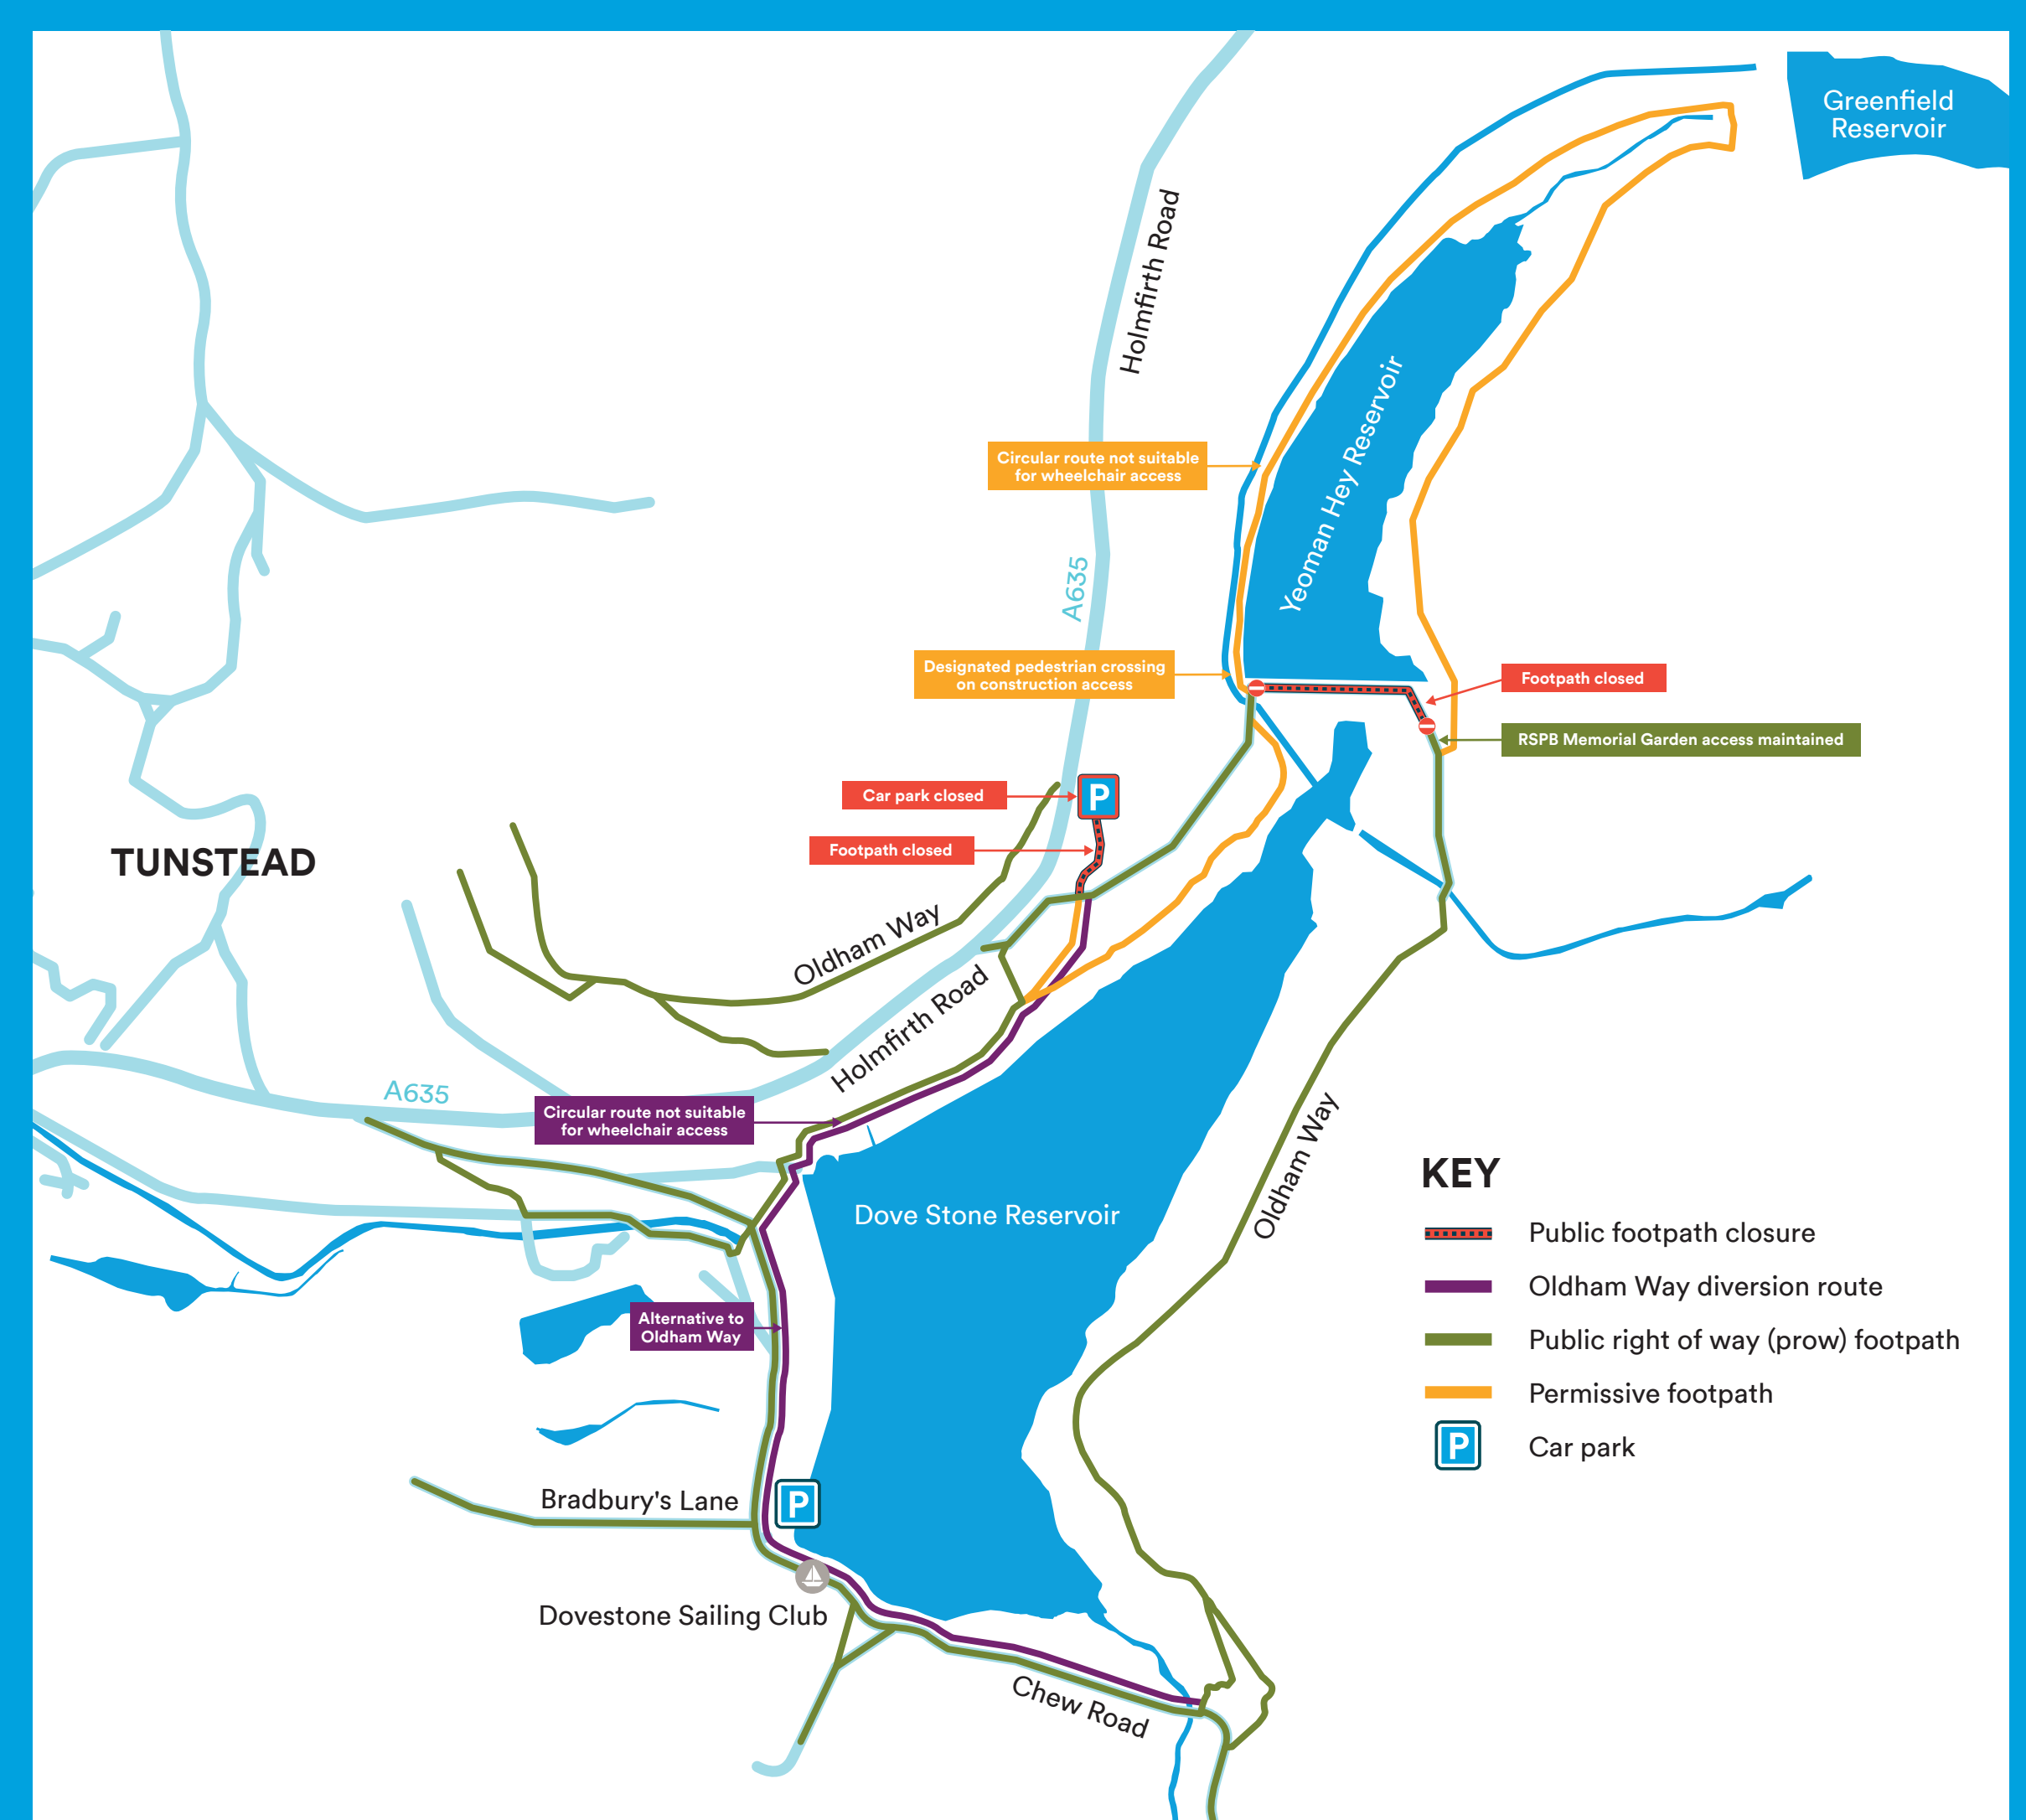

Traffic: During our work you may notice an increase in construction traffic as we bring materials and equipment to and from site along the lane off the A635 (Holmfirth Road). You will still be able to walk along this lane during our works.

Noise and vibration: Our work will involve digging machinery, this can be noisy and can cause vibrations. We will do our best to keep this to a minimum.

Footpath diversion

We apologise that we need to keep this footpath closed for longer than we expected. Due to bad weather and technical issues during construction our work has been delayed. We understand that this type of work can be inconvenient. If this work affects you and your daily routine, we're sorry. We'll be as quick as we can.

Still have a question?

You can call us on 0345 672 3723, quoting project number: MMB-80042019. We'll be happy to help.
